Application for Junior Financial Analyst Position

Dear Hiring Manager,

I am writing to express my interest in the Junior Financial Analyst role at your organization. With a Master's degree in Data Science (Statistics) from NJIT, a recently completed Financial Analyst certification from 365 Finance, and hands-on project experience in financial modeling and ratio analysis, I am eager to bring both analytical rigor and a data-driven mindset to your finance team.

During my certification program, I built a fully integrated Three-Statement Financial Model, constructed a Master Budget for a digital agency covering an entire fiscal year, and applied DuPont decomposition and Altman Z-Score analysis to Volkswagen AG's annual reports (2022–2025). These projects gave me practical exposure to financial statement analysis, forecasting, and valuation — skills I am ready to apply in a professional setting from day one.

My background as a Software Developer at Amazon Web Services and Blossom Technologies has strengthened my ability to work with large datasets, automate workflows, and communicate complex findings clearly — qualities that directly complement financial analysis work. I am proficient in Python, SQL, and Excel, including advanced Pivot Tables and dashboard development.

I am particularly drawn to your organization because of its data-driven approach to financial decision-making, and I believe my combination of technical and financial skills makes me a strong candidate to contribute meaningfully to your team.

I would welcome the opportunity to discuss how my background aligns with your needs. Thank you for your time and consideration.

Sincerely,

Vishal Srinivasan
